

Storm Stiller

Supplies

2 clean 2-liter plastic bottles

Water

Blue food coloring

Waterproof glue
(adult-use only)

Duct tape

Glitter, aquarium gravel,
pebbles, shells, marbles

Directions

Remove caps from the bottles. Fill one bottle half full with water and add a few drops of blue food coloring. To add interest, add items such as glitter, aquarium gravel, pebbles, small shells, or marbles. With adult supervision, use waterproof glue to connect the tops of the bottles together. Let dry completely. Wrap duct tape tightly around the bottle threads three times. Quickly turn the bottles over so the water is at the top. Swirl to make a whirlpool, tornado, or high waves.

Bible Connection

I will fear no evil, for You are with me.
Psalm 23:4

He got up and rebuked the wind and the raging waters; the storm subsided, and all was calm. . . . In fear and amazement they asked one another, "Who is this? He commands even the winds and the water, and they obey Him." Luke 8:24-25

Jesus, God the Son, showed His almighty power when He calmed the storm on the Sea of Galilee by His words. Jesus can help us with any trouble or problem. He proved that when He conquered sin, death, and Satan in His death and resurrection. As students create and play with their Storm Stillers, lead them in a prayer thanking Jesus for His mighty power.
