Unreached *People*

[not land masses!]

If the Great Commission is about people, why do we represent it with geographic maps?

Geographic maps skew our perception of the task: Huge unpopulated areas look like a priority, while geographically small regions with huge populations (like Bangladesh and Java) are overlooked, and the diverse populations of single but large countries (like India and China) are under-represented. This world map is a cartogram based on 2020 population estimates - every pixel represents 100,000 people, shaded by percentage Evangelical.
